(54) Title: SYSTEM FOR ATTACHING ACCESSORIES TO A SHELF

(57) Abstract: The invention relates to a system for fixing accessories, such as shelf dividers, feed devices, holders for information carriers etc. to a shelf (1), to which self a number of accessories may be fixed detachably in various different positions along the length of the shelf. The system comprises at least one accessory (20) provided with a foot (24), and a clamping device (30), which comprises a channel element (31), extending in parallel with the longitudinal direction of the shelf and presenting an open longitudinal side (37) for forming an. open channel (36), a actuatable holding member, extending along the channel element for holding at least one foot in the channel and a control member (65) for transferring the holding member between a holding position, in which the foot is held in a fixation position in the channel and a release position at which the foot is freed.
